SUMMARY: Computer Science undergraduate and 2027 passout with hands-on production engineering experience across three internships — building full-stack AI-native applications, shipping clean Python/JavaScript/C++ code with CI/CD pipelines, and using AI coding assistants (Claude Code, Cursor) as standard daily practice. IEEE-published, ICPC Global Rank 151, AWS and Oracle AI certified — ready to deliver client-facing AI-native software from day one.

EDUCATION

S.R.M Institute of Science and Technology

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.1/10 | **Relevant Coursework:** Data Structures & Algorithms; Software Testing; DBMS; Operating Systems; System Design; Computer Networks.

Chennai, Tamil Nadu

Expected May 2027

WORK EXPERIENCE

Samsung R&D Institute

Research and Development Intern

Bangalore, India

Mar 2025 – Nov 2025

- Designed and shipped production-grade C++ software components across the full engineering stack, applying quality engineering practices including unit testing, peer code reviews, and production-readiness checks across 3 release cycles.
- Used AI coding assistants to accelerate development workflows, validating AI-generated outputs before production use and reducing shading workload by 30% and frame stability by 18%.

National Institute of Technology, Trichy

Summer Research Intern

Tiruchirappalli, India

May 2025 – July 2025

- Built reusable Python software components for a distributed AI coordination platform, applying Git-based version control, CI/CD-aligned testing, and Agile-style iterative delivery across 100+ experimental configurations.
- Used AI-assisted development tools to improve engineering productivity, validating outputs rigorously and exercising sound judgment before integrating AI-generated code into production pipelines.

Research Centre Imarat, DRDO

Machine Learning Intern

Hyderabad, India

Dec 2024 – Jan 2025

- Shipped production-ready Python backend components with automated unit testing and secure coding practices, contributing to client-delivery-equivalent engineering standards in a professional environment.
- Contributed reusable data processing and evaluation assets to team-wide engineering repositories, improving team productivity by ~40% through modular, well-documented code.

PROJECTS

TEAM-FOUR — Full-Stack Collaborative Platform

Mar 2025

- Built a full-stack application using React, Node.js, Express, and MongoDB, applying Git workflows, peer code reviews, unit testing, and Agile delivery practices in a collaborative multi-person engineering team.

AI-FOR-BHARAT — LLM-Powered Document Intelligence Platform

Nov 2024

- Designed and shipped a production-grade AI-native application using Python (FastAPI), React.js frontend, RAG pipelines, and LLM APIs — using Claude as an AI coding assistant throughout, validating all AI-generated outputs before deployment.

PNNM — Production ML System

Dec 2024

- Shipped a production-ready ML system with FastAPI REST backend, Docker containerization, and CI/CD-compatible deployment — applying secure coding practices, automated testing, and production-readiness checks achieving ~9.7x model compression.

ACHIEVEMENTS

Hackathons

- 1st Runner Up** — Agentica International Hackathon, IIIT Sricity — Mar 2025 (out of 150+ teams)
- 2nd Runner Up** — ACM-W Mak-e-thon Hackathon, SRMIST — Oct 2024

Competitive Programming

- Global Rank 151** — ICPC Taiwan International Collegiate Programming Contest

Publications

- IEEE ICCNT 2025, IIT Indore** — "Detection of Marine Oil Spills using Automatic Identification System and Satellite Remote Sensing"

CERTIFICATIONS

- AWS Certified CloudOps Engineer – Associate | Amazon Web Services | Mar 2026 – Mar 2029 | Score: 93.5%
- AWS Certified Machine Learning Engineer – Associate | Amazon Web Services | Mar 2026 – Mar 2029 | Score: 89.3%
- Oracle Cloud Infrastructure 2025 Generative AI Professional | Oracle University | Oct 2025 – Oct 2027
- Oracle APEX Cloud Developer Certified Professional | Oracle University | Aug 2025 – Aug 2027

TECHNICAL SKILLS

Programming: Python, Java, JavaScript/TypeScript, C++, SQL.

Full-Stack & APIs: React.js, Node.js, FastAPI, Spring Boot (basic), REST APIs, MongoDB, PostgreSQL (basic).

AI-Native Engineering: AI Coding Assistants (Claude Code, Cursor), LLMs, RAG, AI Output Validation, Prompt Engineering.

DevOps & Cloud: Git, Docker, CI/CD, AWS (Certified), Azure (basic), GCP (basic), Linux, Agile/Scrum.
